

RIMPI

RIMPI

Rimpi is an acoustic lighting concept for home and public spaces.

Rimpi is an ideal solution for open spaces and restaurants, functioning both as a light source and a creative sound absorber.

The acoustic material used in RIMPI is surface peat moss. It is 100% ecological and acoustically ultra effective (class A) with a unique visual texture. As a fibrous material it creates endless variations of color shadings depending on the light in place. Material is also extremely light and therefore lights are easy to hang.

Designed by Maija Puoskari.

W x L x H

500 x 500 x 340 / E27

Weight 1,2 g

(More sizes coming soon.)

Colours: Blueberry, Moss, Light Dust, Dark Dust
